Matting AB

Responsible design

LCA - Life Cycle Analysis

Matting uses life cycle assessment as an important tool in our early purchasing process and product development phase. This is to make decisions based on the most accurate data we can to achieve the greatest and most far-reaching effects on longevity and reduced climate impact in the product's journey from cradle to cradle. If you want to know more about our work with LCA, you are welcome to contact us. Products with a completed life cycle assessment have this symbol.

EPD - Environmental Product Declaration

In parallel with LCA, there are EPDs based on the international standard ISO 14025. EPDs are third-party verified environmental declarations for products and consist of a PCR (product category rule) and an LCA. Products with an EPD have this symbol.

Circular

For us, developing products equals great responsibility and creating new opportunities for future generations. In addition to innovative design, we focus on ensuring that our products can be easily reused for a long life over and over again with minimal waste. That the products have spare parts and can be easily repaired when long use has taken its toll on certain components. This symbol means that the product has replaceable parts for a long life and/or that we can offer service/ services for updating/reusing the product.

Matting strives to reduce the proportion of virgin materials and minimise the use of raw materials. We therefore choose to use recycled materials in our products whenever possible. This symbol also indicates when a product contains at least 10% recycled material.

PVC-free

This symbol indicates that the product is PVC-free.

Byggvarubedömningen (SE)

This symbol indicates that the product has a Construction Products Assessment and the classification it has received.

Our range is continuously being developed throughout the year. Therefore, feel free to ask us for our latest new products or about projects involving our full range or unique customer-specific solutions. Prices are subject to change, E&OE.

Our vision

Matting's vision is to create well-being to prevent fatigue and encourage creative people.

Matting offers various solutions that create healthy workplaces and accessible environments. We aim to contribute towards a better world by always being daring, innovative, committed, proud and genuine.

Our story

Matting is a family-owned niche company. Matting AB was established in the early 70s by Jon Botha and has become the Nordic region's leading supplier of high-quality ergonomic mats. During the last 10 years, Matting has invested in its own product development and developed strong concepts such as StandUp.

Through our expertise, commitment and cutting-edge product development, we offer sustainable concepts and products for public spaces, workplaces and schools. Our concepts are developed in close collaboration with designers and experts, with a clear focus on sustainability and sustainable people.

We are very intentional about using local production for as many of our products as possible, to reduce unnecessary transport and environmental impact, promote local labour and use natural, non-toxic materials.

Matting focuses on two main areas with concepts for a healthy workplace and active study environment and concepts with products and services for accessible, sustainable and safe entrances and environments.

StandUp & stay active - wherever you are

Our StandUp range is designed for the workplace of the future. Home offices, co-working spaces and activity-based or flexible offices. Yes, quite simply - wherever you are - no matter where your workplace is. All based on our passion to develop solutions that promote well-being and increased mobility.

Our designers

Dan Ihreborn was born in Sweden in 1952 and has worked as a freelance designer since 1991. He works with modern furniture design and specialises in office environments as an interior designer. With his 45 years in the industry, Dan has extensive experience and understands how furniture has changed over the years.

Peter Mattisson comes from Borås. He began his professional career back in the 1970s, starting out at age 16 years as a trainee decorator. Since then, Peter has been active in the fashion industry and has worked in both fashion and interior design. He has worked as a designer since 2004 and, since 2015, has been running his own design agency, Peter Mathisson design.

Next Generation

Matting works actively to reduce the impact on future generations and on our environment. We have begun work to analyse the life-cycle of our products and to create circularity in our processes and products. To help our customers make sustainable environmental choices, we also calculate our products' climate impact.

In our never-ending commitment to reducing our climate footprint and making it easier for our customers to live up to their environmental requirements, Matting has initiated the "LESS WASTE" packaging project. It is about reducing the number of packages as much as possible and reducing waste for the customer. Reducing packaging volume also reduces weight and emissions in transit.

Matting works closely with our hauliers to improve efficiency and reduce our emissions. We follow up on transport, collect data and keep statistics on CO₂ to act where it makes the most difference.

Compliance with EU legislation

Through all stages of production, we demand compliance with our Code of Conduct, and that products conform to the REACH regulation; we always strive to manufacture wooden products sustainably based on the new Deforestation Regulation (EUDR). We work on the basis of maintaining the highest quality requirements for our products. That's why we choose to have several of our products tested and certified by independent institutes such as Möbelfakta, RISE and OEKO-TEX.

Matting always ensures that our products meet the requirements of the REACH Regulation, which restricts the use of hazardous substances. Our lighting is CE marked and meets the requirements of the RoHS Directive. Matting fulfils the producer responsibility for recycling of electronics (WEEE) in accordance with Ordinance SFS 2014:1075.

ISO Certification

Matting AB has an environmental management system certified to ISO 14001:2015 since 2000 and a quality management system certified to ISO 9001:2015 since 2018.

Collaboration with El-kretsen

Under regulation SFS 2014:1075 and the regulation on producer responsibility for batteries SFS 2008:834, we cooperate with Elkretsen AB in respect of producer responsibility for electrical and electronic products. Your used products can be left at the nearest recycling centre or collection point. For further information about the nearest reception station, visit www.el-kretsen.se

Sorting at source

Matting AB has a detailed recycling programme where we sort everything from household waste to wooden pallets.

Packaging materials

Packaging material is a significant, environmental impact factor in Matting's operations. In general, paper and packaging materials are made in Sweden in accordance with standards set by the Swedish Paper Industry Work Environment Council (PIA). All outer packaging used by Matting comes from 100% recycled paper. The packaging also bears the RESU label, a European label approved for European dimensions.

Matting reuses packaging from incoming goods to reduce the need for new packaging. Matting is also preparing for upcoming European product packaging legislation (PPWR).

We exclusively use returnable pallets and are connected to the circular system Pall-poolen.

Member of the NPA register

Matting AB is affiliated to the NPA, <https://npa.se/> (formerly FTI). We pay packaging fees and thereby fulfil our producer responsibility for the recycling of packaging.

Warranty

Our products must be of high quality, must be designed to function in a circular process, and must be durable. That's why we have a 5-year guarantee on our desks, storage furniture and the NEOS range. The rest of our range is backed by at least a 2-year manufacturing and production warranty and is actively working to extend the warranty period based on the upcoming Ecodesign Regulation. The warranty covers production and manufacturing defects. This does not cover normal wear and tear, damage or poor maintenance. The warranty period starts from the invoice date.

Prices

All prices are exclusive of VAT and shipping. We reserve the right, without prior notice, to make price adjustments resulting from changes in commodity prices, exchange rates, clerical errors or other circumstances beyond the control of Matting AB.

Small order charge

We apply a small order charge of SEK 200 for net orders less than SEK 500.

Terms and conditions of payment

Usually 30 days' credit up to an agreed limit following approved credit checks. Matting AB reserves the right to change the credit limit at any time and without notice. In the event of late payment, interest will be charged on arrears and, where applicable, a fee for collection and the payment order.

Delivery time

Delivery time on stocked standard products:

Orders are shipped from Matting's warehouse the next working day, unless the customer requests otherwise.

Delivery time for stocked products that require cutting, trimming or other customisation is 3-5 days.

Delivery times for non-stocked on-demand products vary and are given as per a separate delivery notification.

Shipping

Shipping costs are additional. Order delivered free ex-Mattings warehouse Alingsås. We deliver domestic shipments by DHL, unless otherwise agreed. Any free shipping limit is calculated in relation to the order value of the stocked range separately and the on-demand range separately, as simultaneous delivery dates are not possible. Packaging costs as of 1 July 2022.

Packaging costs invoiced in connection with deliveries on pallets:

EUR pallet: 22,50 €*

Disposable pallet, full: 12,50 €

Disposable pallet, half: 10 €

Pallet collar: 12,50 €

Pallet packaging: 12,50 €

**Does not apply to customers who are members of DHL's pallet pool.*

Transport damage

If the damage is externally visible, please ask the driver to assist to note the damage on the waybill/handheld computer before you sign for the delivery. If you don't note the damage, you will accept the goods in their present condition. If you do not want to accept the shipment due to the damage, you are entitled to reject the delivery before signing for the shipment.

Hidden damages shall be reported to us as soon as possible, but not later than five (5) calendar days after the receipt of goods. You must file a claim for hidden damage within five calendar days of delivery. Contact us at info@matting.se specify the damage and the content, and attach photos of the damage.

Complaints and returns

Each return and unit must be individually approved by Matting AB. For help, please contact us at info@matting.se or on tel. +46 322 670800.

Information concerning return possibilities for batteries, electrical and electronic products:

In accordance with the Ordinance on producer responsibility for electrical and electronic products (SFS 2014:1075) and the Ordinance on producer responsibility for batteries (SFS 2008:834), Matting AB offers to receive used products free of charge to ensure that the product is recycled or processed in an environmentally acceptable manner. The used product can be handed in to:

Matting AB
Tomasgårdsvägen 19
SE-441 39 Alingsås

Any costs incurred in connection with the return transport of the product are not refunded.

Placement guide

Example for restaurants and cafe

The tailored matting solutions are designed to meet the exacting standards of the cafe and restaurants, where cleanliness and safety are not just priorities; they're non-negotiable requirements.

Elevate cleanliness, safety, and performance in your food service establishment with our expertly designed mats. Our entrance mats keep your dining area spotless and safe, making a stellar first impression.

In the kitchen, our durable, easy-to-clean mats enhance safety, while anti-fatigue mats ensure kitchen staff deliver their best during long hours of food preparation and service.

Please contact us if you want other examples.

Entrance mats for all environments

With our proven 3-zone cleaning system, a term that means capturing up to 90% of the dirt and moisture brought in through the entrance. The most optimal solution is a three-zone solution, first a scraper mat that takes care of the worst dirt, then a combination mat that takes the fine dirt and finally a drying mat that also takes the last moisture.

Sometimes there is no room to build an entrance in two or three steps/zones. Then we recommend a combination mat that can both scrape off coarse dirt and dry up moisture.

ZONE 1	ZONE 2	ZONE 3
Outdoors	Indoors/covered entrances	Indoors
Coarse dirt	Fine dirt	Fine dirt / moisture
Scraper mats	Scraper mats	Absorbent mats
